6160/2/6/8	1 3/4"	Radiator Hose	2 1/4" (2.25")

Technical Note

When installing Magna-Clamp fittings on braided hoses, first make sure that the worm gear clamp is completely open. Smooth out or trim frayed ends on the hose. Insert the hose, using your thumb to push and loose strands of braid, into the fitting. Push fitting over hose twisting clockwise as needed.

Cutting Steel-Flex Hoses

To avoid fraying, first wrap the place to be cut with electrical or duct tape. To ease the cutting process, place the hose in a vise. Using a fine tooth hacksaw (32 teeth per inch) cut through the tape and hose. Trim any frayed ends with sharp scissors or diagonal cutters.

Important - clean out hose with compressed air after cutting to remove all debris left by the cutting process.

Magna-Kool Stainless Steel Vacuum Line

Chromes Stainless Steel Hose, to suit $\frac{5}{32}$ " Vacuum Line Applications.

7849 | 36" Stainless Hose with 2 chrome plated end covers and 2 rubber sleeves

Magna-Kool Stainless Steel Fuel Line
